### **DIGEST**

Senate Bill 1, a comprehensive water management plan from the 75th Legislature, established a statutory framework for regional water planning, which will result in the next version of the State Water Plan. The Interim Committee on Water Resources Development and Management monitored the implementation of S.B. 1. Several issues were raised in hearings regarding the regional water planning group functions, including the scope of representation of the group, liability of group members, and ability of the group to enter into contracts with political subdivisions regarding the development of regional water plans. S.B. 272 will clarify the need for groups to add and maintain representation for the various interests required to be included. The bill would further provide the authority for political subdivisions, through contract, to assist a regional water planning group in developing or revising a regional water plan and provide protection from liability along with directing the attorney general to provide representation to group members.

### **PURPOSE**

As enrolled, S.B. 272 regulates regional water planning groups.

### **RULEMAKING AUTHORITY**

This bill does not grant any additional rulemaking authority to a state officer, institution, or agency.
